Education

Purdue University West Lafayette, IN

B.S. Computer Engineering, GPA: 3.81/4.00 *Expected May 2027*

- Coursework: Operating Systems, Computer Architecture, Data Structures and Algorithms, Object-Oriented Programming, Advanced C Programming, Microprocessor Systems

Experience

Vanguard Malvern, PA

Software Engineer, Part-Time *Aug 2026 – Present*

- Redesigned an LLM test data platform to generate reusable scripts instead of records, improving throughput and preserving relationships across complex datasets
- Generated 100K+ synthetic FINRA records in under 10 seconds, exposing a scalability failure in an AWS Lambda workflow
- Built GitHub Actions workflows and a Claude Code skill to automate Lambda testing and integrate test data generation into developer workflows

Software Engineering Intern *May 2026 – Aug 2026*

- Built an AI powered test data platform with AWS services for compliance testing across 12 regulatory sectors
- Built validation pipelines enforcing schemas, field relationships, and business rules on LLM generated data
- Led backend development for a portfolio app, building REST APIs and guardrailed LLM chat workflows

Kyron Medical Oct 2025 – Mar 2026

Software Engineer, Part-Time *Remote*

- Built APIs for AI voice agents handling 100+ daily patient calls for intake, appointment lookup, and scheduling
- Connected the voice agent to healthcare systems so it could access up to date patient and appointment information
- Improved voice agent reliability with fuzzy matching, LLM parsing, and fallback logic for patient responses

Penske Truck Leasing Jun 2025 – Aug 2025

Software Engineering Intern *Reading, PA*

- Built a fullstack app to streamline inspections across 50K+ trucks, projected to save 6K+ hours yearly
- Created reusable forms using Angular, Spring Boot, and SQL for multiple inspection types with centralized reporting

Purdue University Nov 2024 – May 2025

Supplemental Instruction Leader, Advanced C Programming *West Lafayette, IN*

- Led weekly and exam review sessions for 100+ students covering pointers, memory management, recursion, file I/O, and data structures in C

Projects

Dual-Core RISC-V Processor | *SystemVerilog, FPGA* | Code 2026

- Designed a dual-core pipelined RISC-V processor with caches, forwarding, hazard detection, and branch control; reached 71 MHz and passed 95%+ of validation tests

Findify | *Python, FastAPI, Next.js, SQLite* | GitHub 2025

- Built a fullstack internship tracker with FastAPI, Next.js, SQLite, scheduled web scraping, REST APIs, and notifications for new job postings

Technical Skills

Languages: C++, C, Python, Java, TypeScript, SQL, SystemVerilog
Frameworks / Cloud: Spring Boot, FastAPI, React, Next.js, Angular, AWS Lambda, S3, API Gateway, Bedrock
Databases / Tools: PostgreSQL, MySQL, Git, Linux, GitHub Actions, Claude Code, Codex, LLM Agents, Tool Calling
